Professionals

www.pcdp.mn

PCDP LLC is a potential Project Management, Engineering and Construction Company founded in January 2013. At present, PCDP LLC is one of the leading national Engineering and Consulting companies in Mongolia.

Since January 2013 we have completed 76 Engineering Design works including more than 30 nos. of full set detailed design work; provided construction management and contract management services for 9 projects; and executed various construction works for 12 projects. Such projects include industrial and mining infrastructure buildings, roads and bridges, aircraft and other hangars, civil and commercial buildings, school and kindergarten, hospital buildings, shopping mall etc.

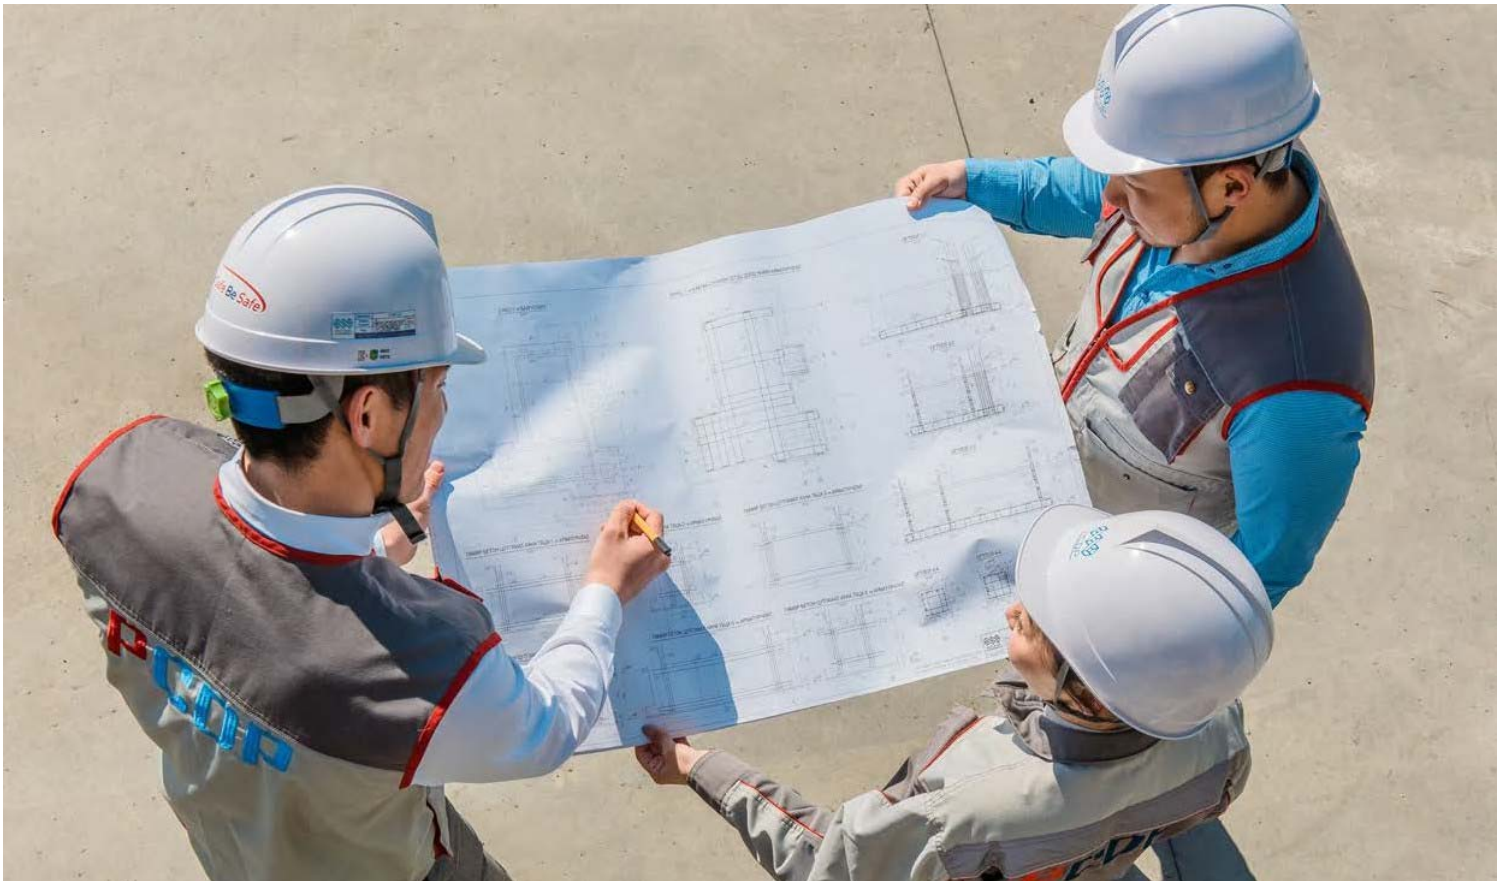

Our core business is the successful delivery of projects from study process through to full turnkey project completion and/or any part and stage of it, providing the Client with single point responsibility.

PCDP LLC work independently or alongside the Client, Project owners, providing expert advice from day one. Such projects include commercial, residential, medical, educational, parking & storage, religious, mining & industrial and infrastructure buildings, and bridges and culverts.

We demonstrate Ethics and Integrity in Business practices and honor our Clients and Customers. We offer environmentally friendly, high-quality and safe products and services at the highest level of standards that meet our Clients and Customers' expectations and needs with an emphasis on the economic efficiency of investments.

PROJECT MANAGEMENT CONSTRUCTION MANAGEMENT

Project management

We are Professional Project Management Company geared to providing best quality, low-cost solutions for projects and formed a team having skills and techniques required for such services, implemented best practices of project management process and teamwork standards. We are regularly seeking best technologies, building Relationship with local and foreign Consultants, Suppliers and Manufacturers, Contractors and Sub-Contractors.

The following services are provided in Project management, including but not limited to:

- Client interface
- Defining project scope
- Planning
- Resource management
- Procurement management
- Master schedule
- Preliminary cost estimation
- Cost estimation
- Contract management
- Contract conditions
- Contract specifications
- Bid documents
- Contractor management
- Design change management
- Cost control
- Commissioning
- Project delivery

Construction management

We are qualified to manage and execute EPC contract works, as well as any part of construction activity and performing in-house RC, Steel erection, installation of HVAC, Electrical and Plumbing systems, Exterior and Interior finishing works. As a part of Project management, we provide Construction management services to ensure contractors perform to the constraints of the programme and to the quality and HSE standards.

We plan the project in a comprehensive, professional and efficient manner, regularly monitoring as well as teaming up with the Contractor and Subcontractors on the construction site and we will provide a guaranteed and high-quality service at the scheduled time.

We offer the following Construction management services, including but not limited to:

- Design coordination
- Construction planning
- Detailed schedule
- Applied technologies
- Methodology
- Method statement
- HSE management
- QA/QC management
- Reporting
- Shop drawing
- Supervision
- Inspection & Testing
- Commissioning

DESIGN

Fulfill your imagination

- Full Design
- In-house Engineering

DESIGN

We make every effort to develop a design in accordance with international and local standards and requirements; and to respect the wishes of the Client and value the for mutually beneficial cooperation.

PCDP can offer a **FULL DESIGN** responsibility across all disciplines in house (Architectural, Civil & Structural, Mechanical & Electrical, Plumbing & Piping, IT communication, Security system and Automation/BMS system) works, including Construction supervision.

ARCHITECTURAL DESIGN SERVICES

- Project survey
- Concept design
- Schematic Design
- Master planning
- Design drawing

STRUCTURAL ENGINEERING SERVICES

- Structural design & analysis
- Foundation design
- New structural technology, testing
- Building rehabilitation and strengthening design
- Building information modeling (BIM)

BRIDGE ENGINEERING SERVICES

- All types of bridge design including road and pedestrian bridges
- All types of transport related structures design including culverts & retaining walls
- Bridge management related services including detailed inspections and design for rehabilitation and strengthening
- Design of temporary forms and falseworks for all types of bridges
- Shop drawing preparation for all types of bridge and special civil structures

INTERIOR DESIGN SERVICES

- Interior planning
- Furniture selection
- Interior material selection
- 3d render
- Design drawing

MECHANICAL ENGINEERING SERVICES

- Heating system
- Ventilation system
- Boiler and heating substation
- Cooling system
- External main and branch pipeline system of heating pipeline; and planning of associated facilities

ELECTRICAL, ENGINEERING POWER SERVICES

- Building power demand calculation
- Voltage drop analysis.
- Power conditioning, surge suppression, uninterruptible power systems (UPS) & emergency power generation designs.
- Specialty power designs using buck boost transformers, step down transformers, low voltage power design.
- Grounding systems design and analysis.
- Lightning protection design.
- Existing building service load analysis and distribution system rework planning.

TELECOMMUNICATION ENGINEERING SERVICES

- Fire detecting-alarming
- CCTV system
- Access control
- Network and telephone system
- Public address system
- Intrusion alarm system
- Domo phone system

QUANTITY SURVEY, COST ESTIMATION

- WBS
- BOQ
- Preliminary Cost Estimation
- Detailed Cost Estimation
- Cashflow Forecast
- Unit Rate
- Material and Equipment Lead Time Forecast

PLUMBING ENGINEERING SERVICES

- Cold and hot water system
- Sewage system
- Firefighting system /water, foam and gas/
- External main and branch pipeline system of water supply and sewage; and planning of associated facilities

LIGHTING ENGINEERING SERVICES

- Conceptual lighting design.
- Lighting calculations for interior and exterior including vertical and horizontal calculations, uniformity ratios and more.
- Lighting control strategies.
- Lamp specification for high color rendering and warm color temperature.
- Parking area and building entry lighting design.
- Architectural lighting for building façade illumination and highlighting.

AUTOMATION ENGINEERING SERVICES

- HVAC system's control panel solution and design
- Heating plant automation solution and design
- Building management system solution and design
- Home automation system solution and design
- Control panel programming
